## Quality Glossary - Q

**Quality:** “Subjective term for which each person or sector has its own definition” .....

Technical

1. Product or service characteristics that impact its ability to satisfy stated or implied needs
2. Defect-free product or service

*Juran – “fitness for use”*

*Crosby - “conformance to requirements”*

**Quality Management System (QMS):** “A formalized system that documents the structure, responsibilities and procedures required to achieve effective quality management.”

**Coordinated activities to ensure Customer and Organization requirements are met**

# What is a process?

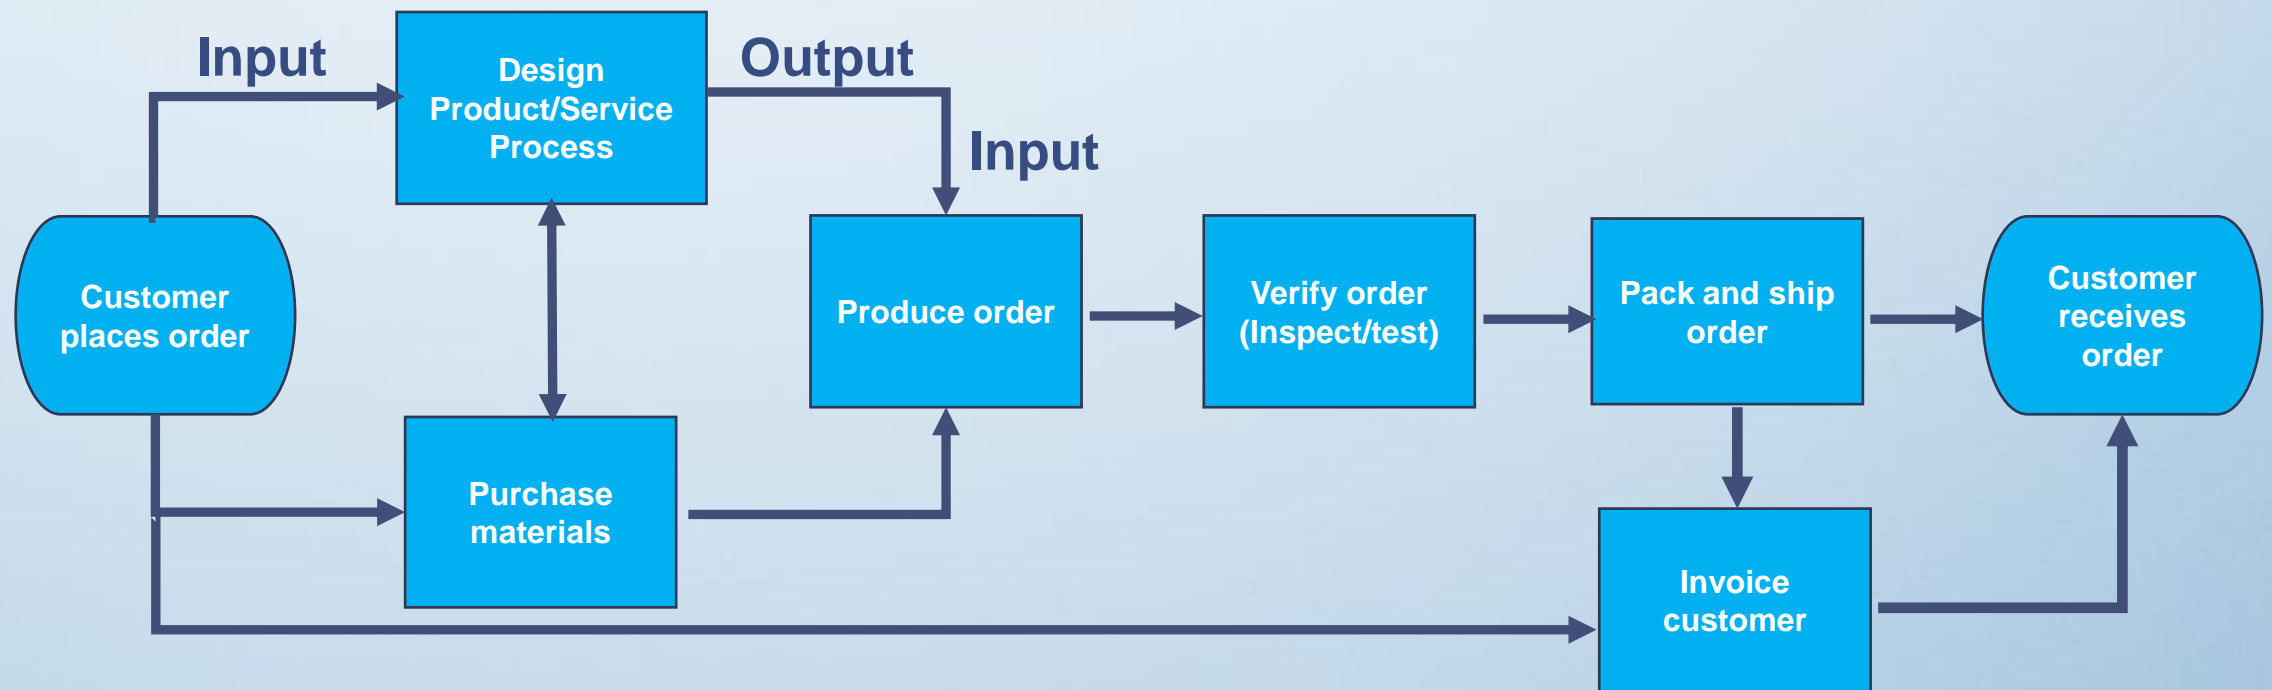

A set of interrelated or interacting activities which transform inputs into outputs.

A set of interrelated or interacting activities which transform inputs into outputs.

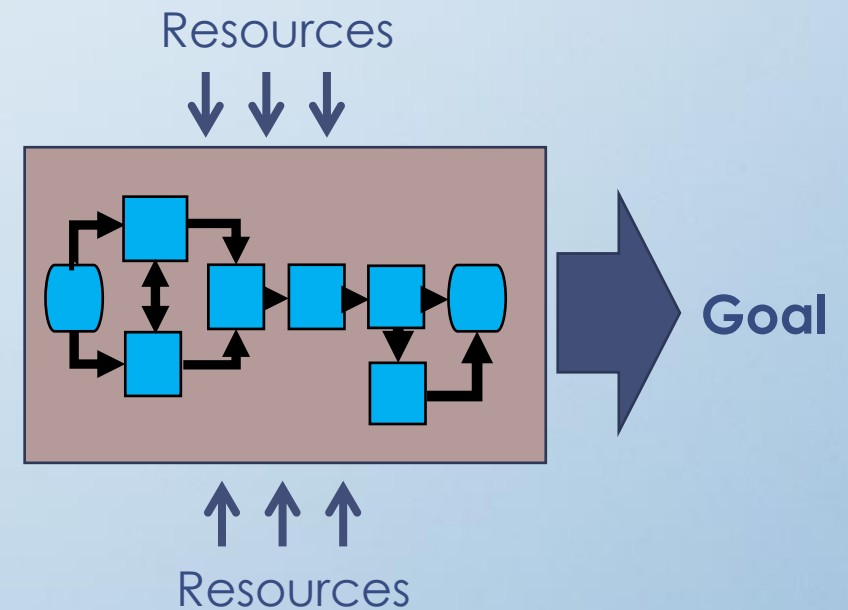

- All processes have inputs and outputs
- Outputs often are inputs to next step

# What is a system?

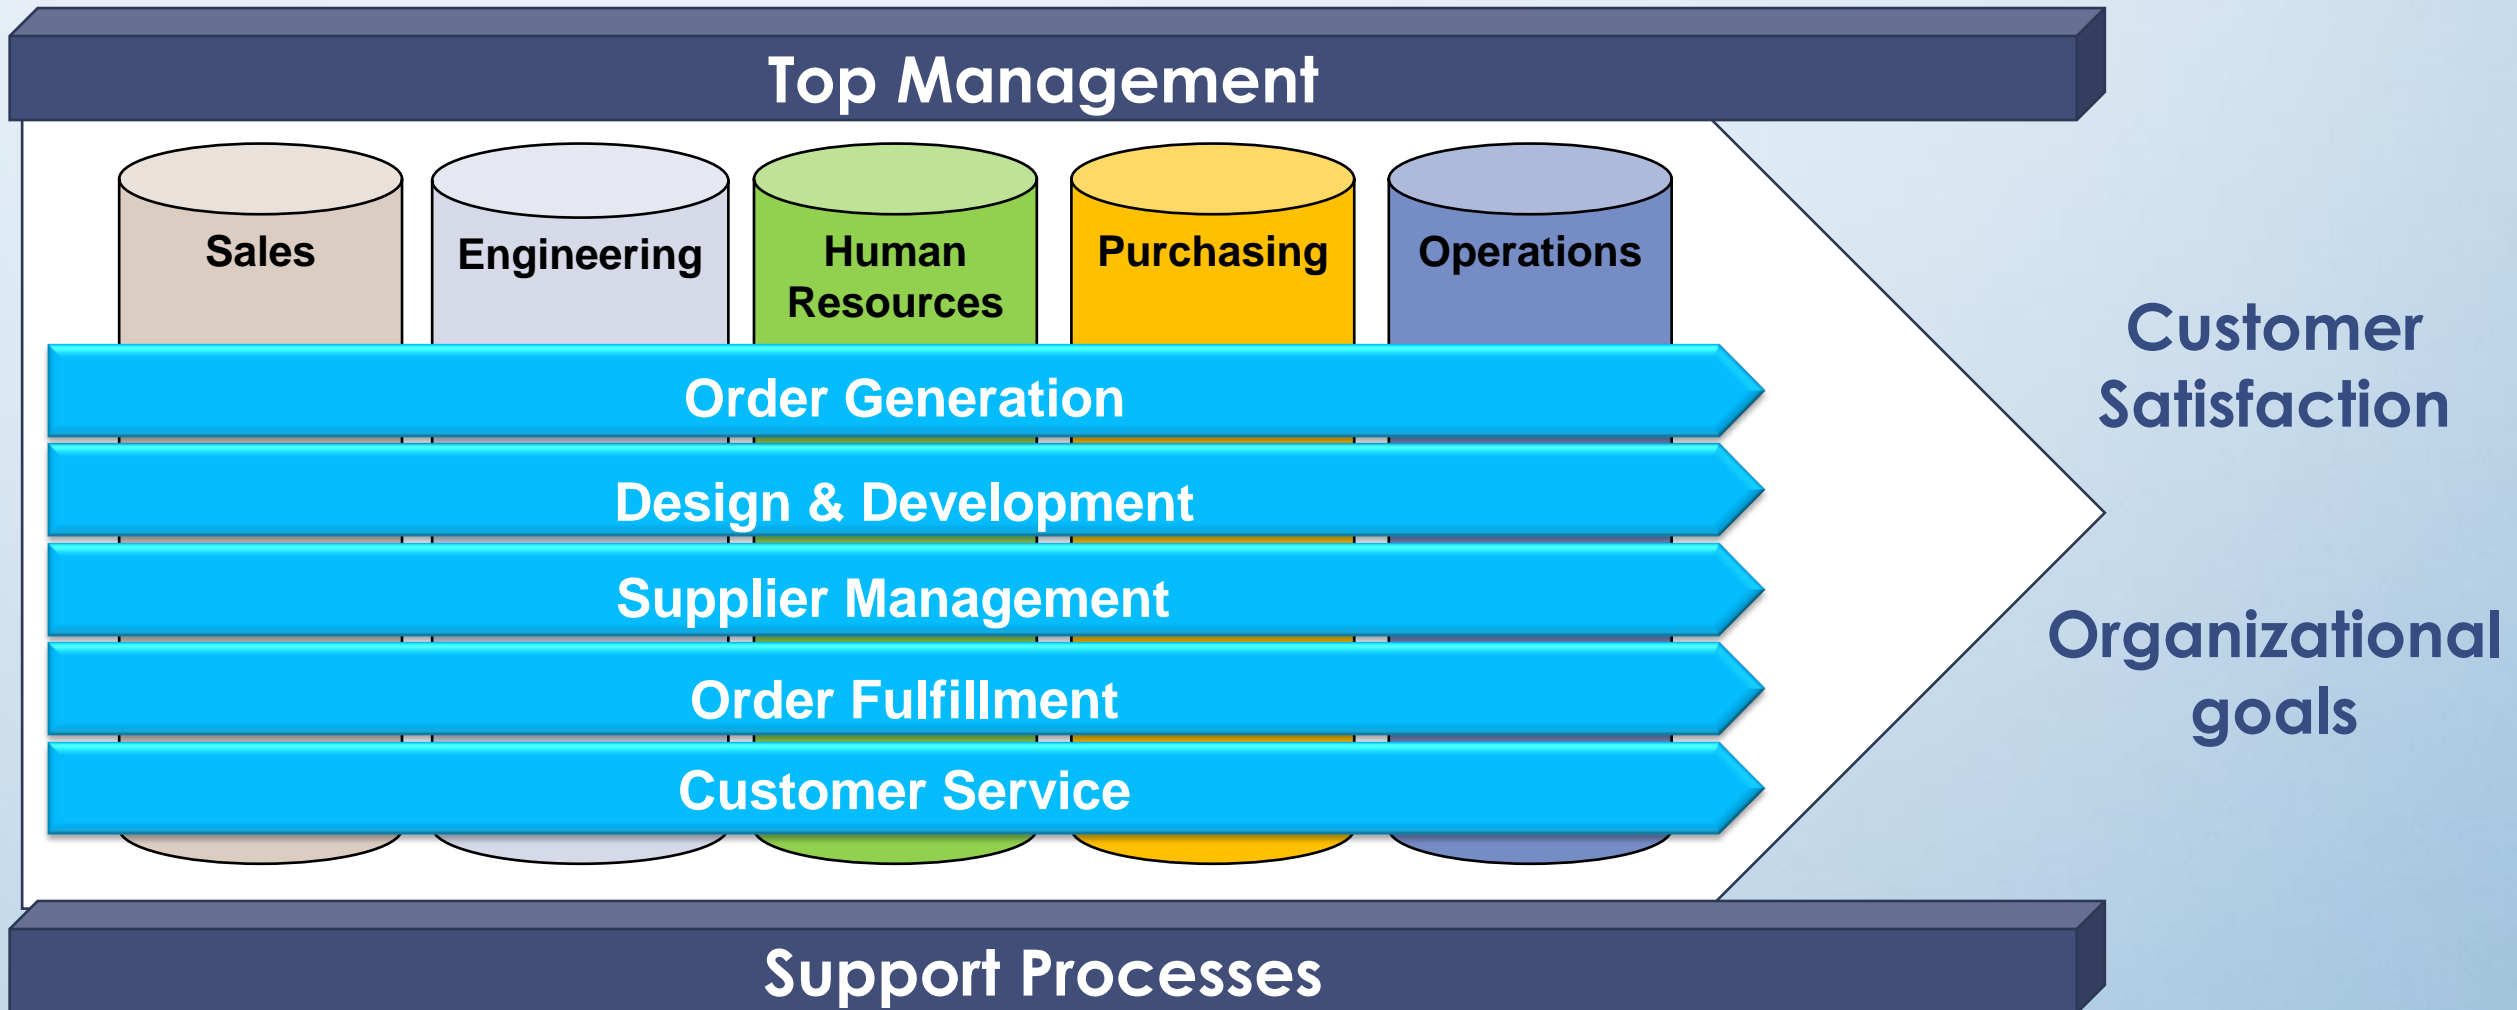

A collection of processes working together to achieve a common purpose....

- Processes and interaction managed as a network
- Share resources
- Consistently operate as a network

# System approach

# Benefits
